## INDICATORS FOR PEDIATRIC OCCUPATIONAL THERAPY

Taylor Physical Therapy is excited to announce the addition of Bailie Schipper, OTR/L to the comprehensive pediatric therapy team! Bailie graduated from Allen College with a Master's of Science degree in Occupational Therapy in 2019 and joined the Taylor Therapy Team in June 2022.

When asked why she wanted to specialize in pediatric occupational therapy, Bailie replied, "I wanted to become a pediatric occupational therapist because I enjoy working with kids and helping them meet milestones and skills to be able to participate with their peers and in daily tasks. I also love that you can be more creative with treatment plans because they primarily center around play. In addition, it is very rewarding when a child is able to master a skill that had been, at one time, really difficult!"

The addition of Bailie to the Occupational Therapy department and the Pediatric Therapy Team brings Taylor Therapy's Pediatric Team totals to two occupational therapists, three speech therapists, and three physical therapists. Bailie and Lynda are specifically trained in the field of pediatric therapy to utilize play in their sessions to promote skill and age-appropriate activities. As pediatric occupational therapists, Bailie and Lynda's treatment plans are patient and family-focused to determine the child's strengths, areas for improvement, and overall child/family goals. They work with children of various diagnoses/disabilities or after an injury or accident to maximize their function and quality of life.

**Bailie Schipper, OTR/L**

**Lynda Bohlmann, OTR/L**
